

Flutter Button Information

ElevatedButton

A button with elevation, used for prominent actions.

Example: `ElevatedButton(onPressed: () { }, child: Text('Click Me'))`

TextButton

A simple, flat button with no elevation.

Example: `TextButton(onPressed: () { }, child: Text('Click Me'))`

OutlinedButton

A button with an outline border but no elevation.

Example: `OutlinedButton(onPressed: () { }, child: Text('Click Me'))`

IconButton

A button that displays an icon instead of text.

Example: `IconButton(icon: Icon(Icons.star), onPressed: () { })`

FloatingActionButton

A circular button used for primary actions.

Example: `FloatingActionButton(onPressed: () { }, child: Icon(Icons.add))`
